Experience

BreakInterview Jan 2026 – Apr 2026
Backend Developer Intern *Remote*

- Developed and maintained backend services using Node.js and Express.js, building RESTful API endpoints for core application features.
- Wrote and optimized database queries and schemas to support application data flows.
- Debugged and fixed backend issues, collaborating with the team via Git for version control and code review.

Gawande Krushi Kendra Apr 2026 – Jun 2026
Full Stack Developer *Remote*

- Architected and deployed a production MERN stack e-commerce platform (gawandekrushikendra.store) on a custom domain, owning everything from database design to server configuration.
- Engineered secure authentication flows and role-based access control (RBAC) for the internal admin dashboard.
- Designed scalable MongoDB schemas for dynamic product inventory and order management, exposed via RESTful APIs.
- Managed end-to-end production deployment: environment variable security, database provisioning, and DNS record routing.

Cafe Hide Out 2026
Frontend Developer *Remote*

- Built a fully responsive landing page (cafe-hide-out.vercel.app) for a paying cafe client using React.js, Tailwind CSS, and Framer Motion, optimized for mobile performance.

Projects

AI Complaint Management Co-Pilot (Pharma) | *React, Redux, FastAPI, LangGraph, Groq LLM* 2026

- Built a multi-tool agentic AI co-pilot with LangGraph and Groq (Llama 3.3 70B) that logs, edits, and extracts customer complaints from natural-language input and documents, with zero manual form entry.
- Designed deterministic intent-routing logic to dispatch requests across three AI tools (Log, Edit, Document Extraction) instead of LLM-based classification, improving reliability and reducing latency.
- Engineered a single LangGraph reasoning node as the source of truth for complaint risk/severity, auto-generating summaries, probable root cause, and CAPA recommendations.

AI Job Search Automation Agent | *Python, FastAPI, Playwright, LLM Scoring* 2026

- Developed an autonomous agent that scrapes live job/internship listings via Playwright and scores each against a candidate skill profile using Llama 3.3 70B (NVIDIA NIM).
- Built a self-hosted, cost-free pipeline (FastAPI, SQLite, Telegram Bot API) delivering a daily AI-ranked job digest, with auto-apply as the next milestone.

OpenRouter Gateway | *Python, FastAPI, SSE* 2026

- Engineered a FastAPI gateway that translates OpenAI-compatible API requests into a locally running OpenCode server, letting any standard OpenAI-client tool drive a self-hosted coding agent.
- Resolved systemic issues in SSE streaming, null-response handling, and module import structure to stabilize the gateway under real request loads.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Next.js, Tailwind CSS, HTML5/CSS3, Framer Motion, UI/UX Design
Backend: Node.js, Express.js, RESTful APIs, FastAPI, Authentication Systems
Databases: MongoDB, Mongoose, SQLite, Data Modeling, Schema Design
AI & Agentic Systems: LangGraph, Agentic AI Workflows, Groq LLM, NVIDIA NIM, LLM Tool-Calling, Prompt Engineering
Developer Tools: Git, GitHub, Playwright, Postman, VS Code, Vercel, Render, DNS Configuration, NumPy, Pandas

Education

N.K.S.P.T. Pathrikar College Graduated 2025
Bachelor of Computer Science *Jalna, Maharashtra*
